Inside 1

*2 Feet / minute*

*Faster*

*Accurate*

*Precise*

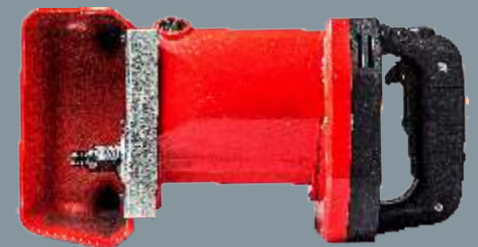

*One labour can use  
the machine.*

*Citadel Wall chaser  
is the solution  
for all.*

Its high speed of 2 Feet / minute, saves you from all the time delays by conventional methods and **saves valuable time and money.**

Its **precision** and accuracy takes gives you the perfect grooves, you want, with no material wastage and accurate positioning. Further perfect grooving, ensures there is no damage and leakage later on.

## Inside 2

### *Don't Weaken the Walls & your Spirits...!*

Our plumbing and electrical work often causes more damage to the walls than any other activity. The conventional hammering, **weakens the joints** and may progress to **water seepage** gradually apart from sound leakage. Moreover the noise is always a pain at the construction site.

Apart from these drawbacks the major setback is the time **taken to complete the work**, as subsequent works are depending on this and are always in pipeline, a delay in this has further repercussions on the **overall delay and commitments**.
